

WELDING

This program is designed to prepare the student for employment in the broad field of welding. It prepares students for welding certification, leads to occupations in manufacturing and repair, and helps prepare students for positions in supervision.

The college is a testing agency for the City of Los Angeles and is authorized to administer the performance test for the Structural Welding Certificate. There is a \$50 charge for students and \$60 for non-students to take this test. Topics of the written portion of the test that is administered by the city are reviewed in various welding courses offered by the college.
